

SmartInspect

Cleaning Assessments Made Easy

Web-based Quality Management for Cleaning and Building Services

ESC FEDERAL

National Reach. Local Touch.

Benefits At a Glance

ESCFederal's quality assurance program utilizes customized "Smart Inspect" software. This software is an industry-leading software platform built to make janitorial inspections quick, easy, and thorough. It is web-based and allows our customers to view easy-to-read reports on their own customized web page. No software installation is required.

1 Smartphone / iPhone Inspection

Inspections are performed with a smartphone loaded with customized SmartInspect software that has been configured to your facility's exact cleaning specifications. Use the touch screen to select locations, buildings, rooms and area types specific to your facility.

2 Easy to Understand Reporting

Simple sensible reporting you can actually use is at your fingertips. Manage inspections and improve quality in ways that impact your bottomline. The software can be easily configured for your unique property needs. Collect data you can act on. Automate report preparation. Monitor improvements. SmartInspect does it all for you.

3 Trend Analysis & Goal Accountability

The Quality Trend Report is one of the most powerful quality improvement tools available today. The user can analyze progress and trends and can refocus efforts to meet the organization's quality goals. View overall trend or view trends by area type, item or deficiency.

4 Web-based, Secure, Backed Up

SmartInspect is completely web-based. All Inspection data is stored on our secure and stable server. Therefore, you do not need to install any applications on your computers or worry about backing up files or databases.

5 Communications Message Board

Communicate with clients, building owners, supervisors and anyone else who has a user name via the communications message board. All comments are stamped with a date and time and email notifications can be sent when new messages are posted. This is a great way to stay in touch and keep a log of all site-related requests

The Right Solution. The Right Price.
